

Liver Transplant Program

The Liver Transplant Program at Baylor St. Luke's Medical Center, in collaboration with Baylor College of Medicine, offers the best possible patient experience for liver transplants and complex liver care. Since 1998, our national recognized surgeons in the Liver Transplant Program have performed more than 1,500 transplants in the city of Houston. Our patients benefit from excellent outcomes and low complication rates, which makes it one of the premier centers in the country.

A Collaborative Approach

The Liver Transplant Program takes a comprehensive, collaborative and personal approach to care, which ensures the best possible outcomes and the highest quality of life for our patients. We bring together the best and brightest minds at Baylor St. Luke's — Surgery, Hepatology, Radiology, Pathology, Psychiatry, and Oncology — to collaborate during a patient's care and treatment.
